Key skills

ReactJS, Typescript, Apollo GraphQL, REST, WebSocket, React Router, MaterialUI, Styled Components, ApexCharts, React Spring, Redux, Redux Toolkit, Redux-Saga, i18n, Axios, Git, Docker, Webpack, Vite, StoryBook, Vitest, Javascript, VueJS, Vuetify, SASS, HTML, CSS.

Additional skills

The ability to work in a team, the ability to understand someone else's code, SCRUM, Photoshop, Figma, high learning speed

Experience

Frontend Developer Source, ltd (Dec, 2020 - Present)

Profital project:

Teamwork to create a comprehensive high-load platform for accounting and information transfer (marketplace). Workflows were based on SCRUM (sprints) and GitFlow.

I have developed and participated in almost all parts of the project: routing (React Router 6), authorization (jwt), complex multi-page forms (React-Hook-Form), chats and event notifications (based on mattermost api and WebSocket), tables (TanStack Table), stylization based on MaterialUI 5, Styled Components, charts and graphs (ApexCharts), animations (React Spring). The project consists of many complex entities: offers, responses, transactions, payments, reviews, ratings, disputes, chats, currencies, wallets, as well as the administration of all this. I also filled the storybook, wrote tests for Vitest.

Used: React, Typescript, MaterialUI 5, Styled Components, ApexCharts, React-Hook-Form, TanStack Table, i18n, React Spring, Apollo GraphQL, WebSocket, GitHub, Docker, Vite, HTML, CSS, SASS, StoryBook, Vitest.

The E-deal and Thailhook project:

Work in a team to create and refine the components of the company's CRM system. Working with tables (TanStack Table), filters, routing (React Router 5), MaterialUI 4, Typescript, Redux Toolkit, Redux Saga. Interaction with the backend via the REST API, Axios. Docker, Webpack. Copying and creating templates, html, css, js, jquery, bootstrap website layout, code and content optimization.

Pet-projects:

CSV file Editor - developed an application on Electron + React + MaterialUI - automatic, specific processing and validation of csv files.

Website development for construction companies:

Grandstroy and UMS-stroy - used: React + MaterialUI + Typescript

IE Kamoza A.I. - used: Vue 3, Vuetify

Образование

Vadim Prokopchuk's layout course From 0 to 1 (Dec, 2020 - Feb, 2021)

html, css/sass/scss, BEM methodology, jquery basics, js basics, gulp, git, adaptive layout, website hosting

Donbass National Academy of Construction and Architecture, Makeevka (1999 - 2004)

Economics, marketing, management. Business economics
